

## Christian Robles

+1(909)451-1716 · roblesch@usc.edu

<https://blog.roblesch.page>

### EDUCATION

#### University of Southern California

Viterbi School of Engineering  
Master of Science, Computer Science  
Multimedia and Creative Technologies

Los Angeles, CA

May 2023

GPA: 3.85

- **Multimedia Systems Design**, End-to-end multimedia systems – content creation, compression, distribution.
- **Computer Graphics**, OpenGL, 2D and 3D transformations, Bezier Splines, rendering including ray tracing, shading and lighting.
- **3-D Graphics and Rendering**, Transformations, shading, lighting, rasterization and texturing for scenes of 3D models.
- **Analysis of Algorithms**, Fundamental techniques for efficient algorithm construction.

#### Arizona State University

Ira A. Fulton Schools of Engineering  
Bachelor of Science, Computer Science

August 2013 – May 2017

### TECHNICAL SKILLS

**Languages:** C++, Java, Python, R, Go

**Tools/Frameworks/Patterns:** OpenGL, Qt6, GLSL, Git, Containers, CI/CD, Pipelines, Infrastructure-as-Code, Pandas, Tidyverse

### WORK EXPERIENCE

#### Software Engineer II

Microsoft, Cambridge, MA

July 2017 – July 2021

- Shipped infrastructure-as-code, CI/CD pipelines, build systems, and test infrastructure targeting the Azure Cloud with Microsoft's top enterprise partners.
- Worked with top partners in Financial Services to transition critical build systems and infrastructure to the Azure Cloud.
- Prototyped new products and extended data platforms with Azure services alongside partners in Transportation and Energy.
- Collaborated with Microsoft and Academic Data Scientists to design and implement feature engineering pipelines in Healthcare.

#### Summer Technology Analyst

Goldman Sachs, New York, NY

Summer 2016

- Worked with Cloud Infrastructure team to develop data pipelines and dashboards for private cloud-based endpoints.
- Enhanced visibility on patch and security compliance for over 85K cloud-based endpoints with Elasticsearch and Kibana.

### PROJECTS

#### Shortest Path to Multiple Importance Sampling, 12/2021 – 02/2022

- Personal blog post outlining critical theory for Multiple Importance Sampling from Eric Veach's 1997 thesis with a minimally viable code implementation.

#### HyperVideo Media Player, 10/2021 – 12/2021

- End of term project for Multimedia Systems Engineering - Qt6 Applications for authoring and viewing HyperVideo files that allow users to create and modify links between videos with a custom video format.

#### Ray and Path Tracers, 05/2020 – 12/2021

- Implemented ray and path tracers for Peter Shirley's *Ray Tracing in One Weekend*, Ravi Ramamoorthi's CSE167x, and *Computer Graphics* course at University of Southern California.

#### Multimedia Style Transfer, 05/2020 – 07/2020

- Projects exploring style transfer of textures on 3D scans and viability of a real-time style transfer plugin for TouchDesigner. Presented internally at Microsoft and shared as a personal blog post.

#### Cystic Fibrosis Patient Clustering & Device Classifier Feature Pipelines, 09/2018 – 08/2019

- Designed and implemented a data featurization pipeline for over 12 TB of Cystic Fibrosis data in a black-box research environment with strict constraints on libraries, memory usage, and session length.

### INTERESTS AND HOBBIES

**Volunteering and Education**, Taught AP Computer Science A to High Schoolers via the TEALS Program with Microsoft.

**Physically Based Rendering**, Read academic literature and create side projects to share on my personal blog.

**Hiking and Rock Climbing**, Passionate about indoor and outdoor bouldering and sport climbing.
